Deckowood® ahşabın sıcaklığını, akustik konforla birleştiren, tavan ve duvarlarda dekoratif tasarım olanakları sağlayan paneller serisidir. Paneller düşük formaldehid içerikli mdfden üretilmekte ve farklı tipte doğal ahşap kaplama seçenekleriyle sunulmaktadır.

Deckowood® panels are produced in MDF (Medium density fiberboard) with a low formaldehyde content and offers warm wood appearance on ceilings and walls which provides acoustic comfort available in many different natural wood essence veneers.

Akustik ahşap paneller, ofis, showroom ve lobi alanlarında doğal bir görünüm sunmaktadır. Delikli ahşap paneller, farklı perforasyon tipleriyle orta ya da yüksek seviyede ses emilim performansı sağlayan ve akustik projelendirmelerde sık kullanılan dekoratif ürünlerdir. Özellikle alanın tamamının yüksek derecede ses yutucu panellerle kaplanamadığı yerlerde düşük oranda perforasyonlu ürünlerle ses yansıtıcı paneller olarak da işlev görmektedirler.

Wooden panels offer natural look for the lobbies and office areas. Offering medium or high level of sound absorption with various perforation types, perforated wood panels are used with exclusive acoustic projects. Especially used as sound reflecting panels for the spaces like conference halls, theatres where high-sound absorbing panels can not be installed all around the spaces.

Lineer ahşap tavan sistemi, mdf-lam dan kesilmiş çıtaların veya masif ağaç çıtaların yanyana istenen aralıklarla dizilmesi ve bir modül haline getirilmesi ile ardından da istenilen taşıyıcı sisteme entegre edilerek sökülüp takılmasına imkan sağlanarak oluşturulan son derece dekoratif bir tavan sistemidir. Kullanılan malzemelerin kesim ve işleme kolaylığı, en, yükseklik ve boy ölçülerinin istenildiği şekilde olabilmesi, tasarımcılara oldukça geniş olanaklar sunmaktadır. Izgara biçiminde lineer ahşap görüntüsü, hem estetik kaygılara hem de ortamın hava sirkülasyonuna katkı sağlamaktadır.

Linear wooden ceiling system is an extremely decorative ceiling system formed by aligning mdf particle board laths or solid wood laths with desired intervals and then being integrated to desired carrier system in a manner to enable it being mounted and demounted. Ease of cutting and processing of materials used, the width, height and length being at desired dimensions offers the designers vast possibilities. Linear wooden look in shape of a grid contributes both to aesthetic concerns and the circulation of ambient air.

MONTAJ

Çıtalar, birbirine içlerinden geçen alüminyum boru ile bağlıdırlar. bu borular da bir klips vasıtasıyla modülleri taşımak üzere ana taşıyıcı profile bağlanırlar. istenilen sayıda çıta bir modül oluşturur ve bu modül taşıyıcıya bağlı bulunan klips sayesinde istenildiği zaman sökülüp takılabilir. Çıtalar da uc uca basit bir ekleme aparatıyla eklenirler.

MONTAGE

Laths are joined each other with traverse aluminium pipes. And such pipes are connected to the main carries to carry the modules by means of clips. Laths with desired number forms a module and this module may be demounted and mounted when desired by means of a clip attached to the carries.

Aluminyum Borulu T24 Taşıyıcı Lineer Ahşap Asma Tavan Sistemi

*Aluminium Tube - T24 Carrier Linear
Wood Suspended Ceiling System*

Teknik Bilgiler:

Ürün:

Aluminyum Borulu
T24 Taşıyıcı Lineer
Ahşap Asma Tavan

Ebatlar:

18x100-120mm, boylar:
imalat çizimine göre

Taşıyıcı Sistem:

T24 (24x38mm)
ana taşıyıcı galvaniz
çelik profillerden oluşur.

Özellikler:

c/c: 100mm
akstan aksa uzaklık

Technical Info:

Product:

Wood Linear Suspended
Ceiling System

Sizes:

18x100-120mm
lengths : according to shop
drawing

Suspension System:

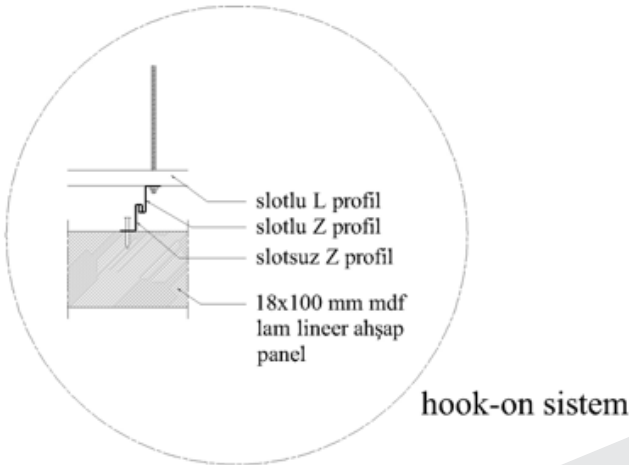

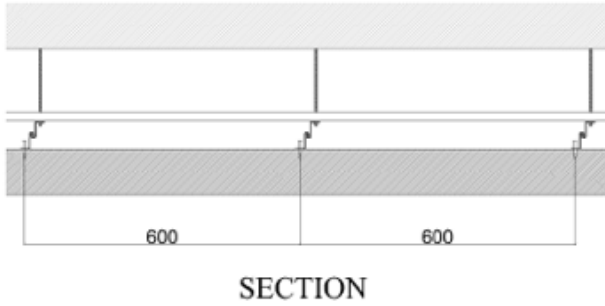

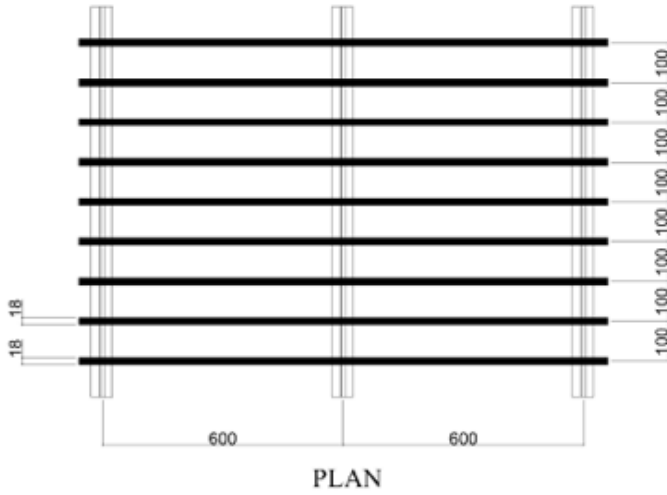

T24 system made of main
tee (24x38mm), galvanised
steel

Specification:

c/c: 100mm center to center
distance
